

STNB Template

X. Y.

ABSTRACT. This is a template to be used for the papers corresponding to the presentations given at STNB (Barcelona Number Theory Seminar).

This template can be used to prepare papers for conference proceedings of STNB. It comes with a simple set of formatting instructions to print the heading.

The full text of the document can be included here, by using sections, subsections and so on. Authors can use own macros and style for theorems, definitions and others environments, unless specific instructions are given by the editors of each volum.
